## Introduction

This is a website to guide locals and tourist for Kurdistan's destination spots. It lets users add spots which will be later proved by admins then the spots will be visible for all.

Spots can be filtered by city to let viewers browse easily. This website will help us to share destination spots to each other by sharing it's coordinate, name, city and description.

The website is mobile responsive.

## Website Components

### Sign in and Signup

Users must be signed in to add spots and have some other capabilities. First user to be created with the name Admin has an admin role and the admin could assign other members to the role.

Users name must be unique, and the 2 form have validations in them.

### Spot Listing

Users could browse the map and filter spots by their desired city. Spots are clickable which will open a pop up to show brief information and an image of it, you could even open the spot and visit it's page.

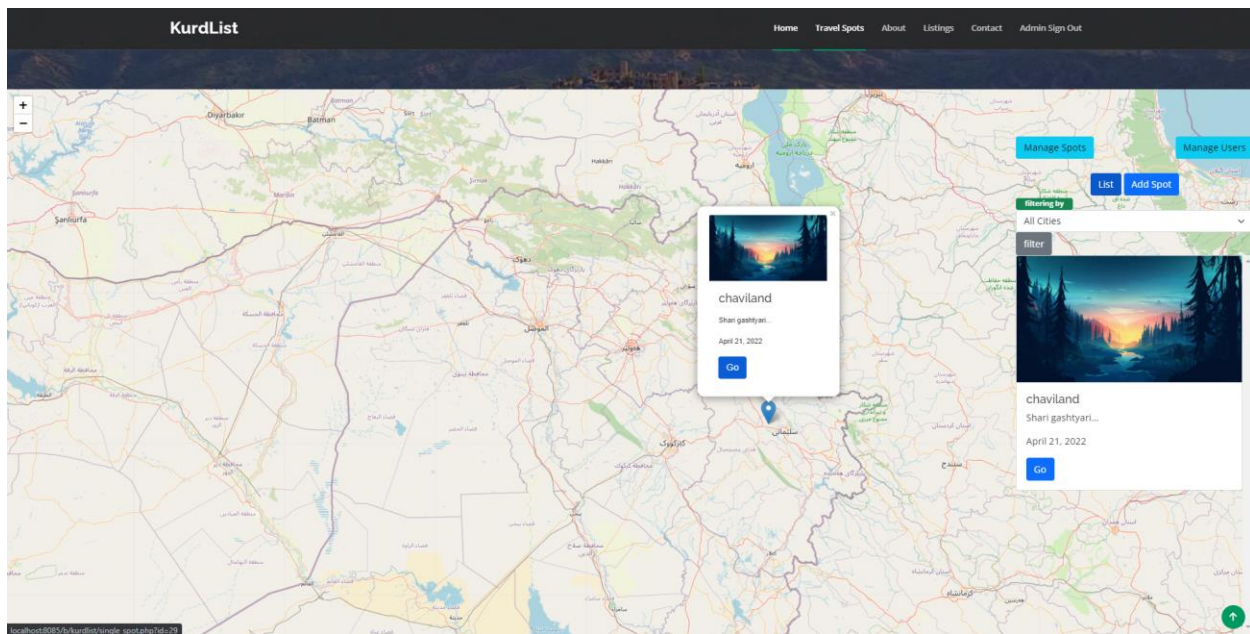

Figure 0.1

### Add Spot

Users could add spot but the spots they add won't be shown on the map until an admin approve of it.

When an admin adds a spot they have an option to approve it immediately.

Clicking on anywhere on the map will copy the coordinates to the desired field.

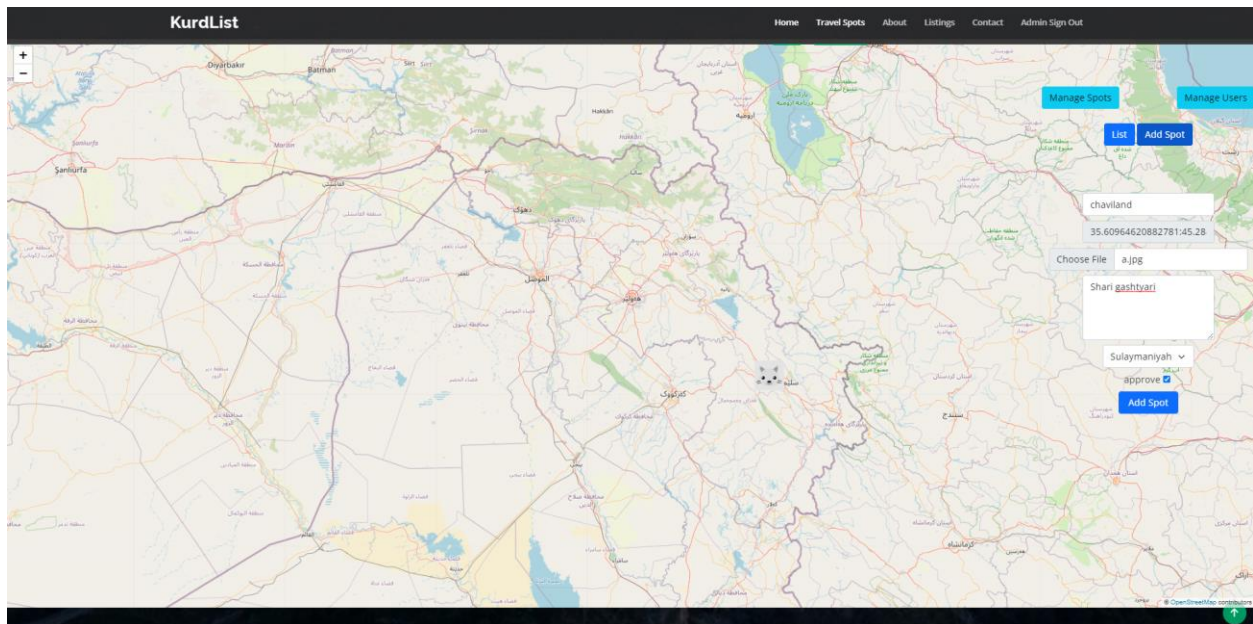

Figure 0.2

## Manage Spots

Only admins could manage spots and see it's listing, here they could change their information and approve spots. After being approved the spot will be shown on the map.

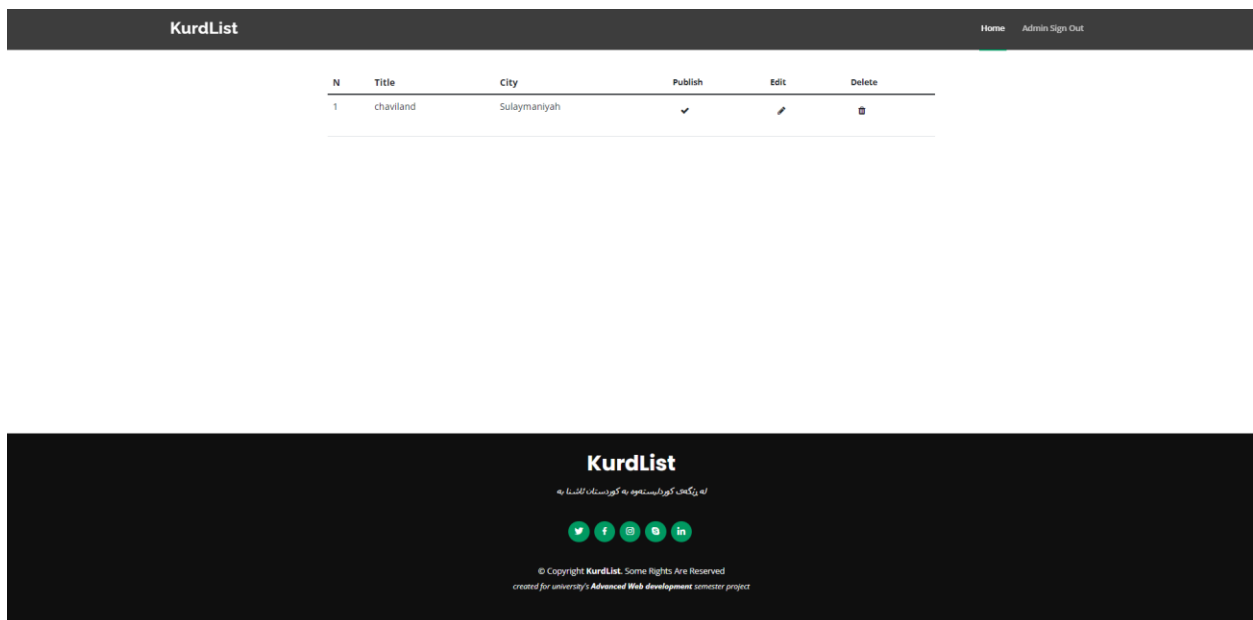

Figure 0.3

## Manage Users

Admins could change other users roles, making them admin or normal users.

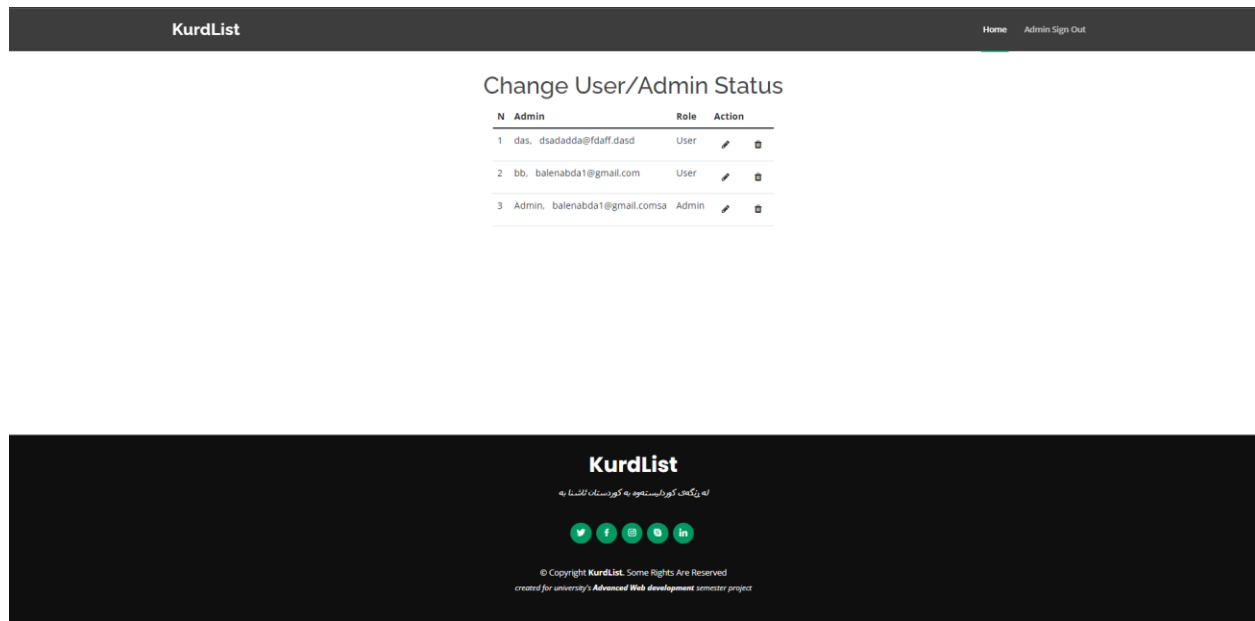

Figure 0.4

## Listings

In this listing a limited number of the latest spots will be shown, which could be filtered by city.

Here even unapproved spots could be shown.

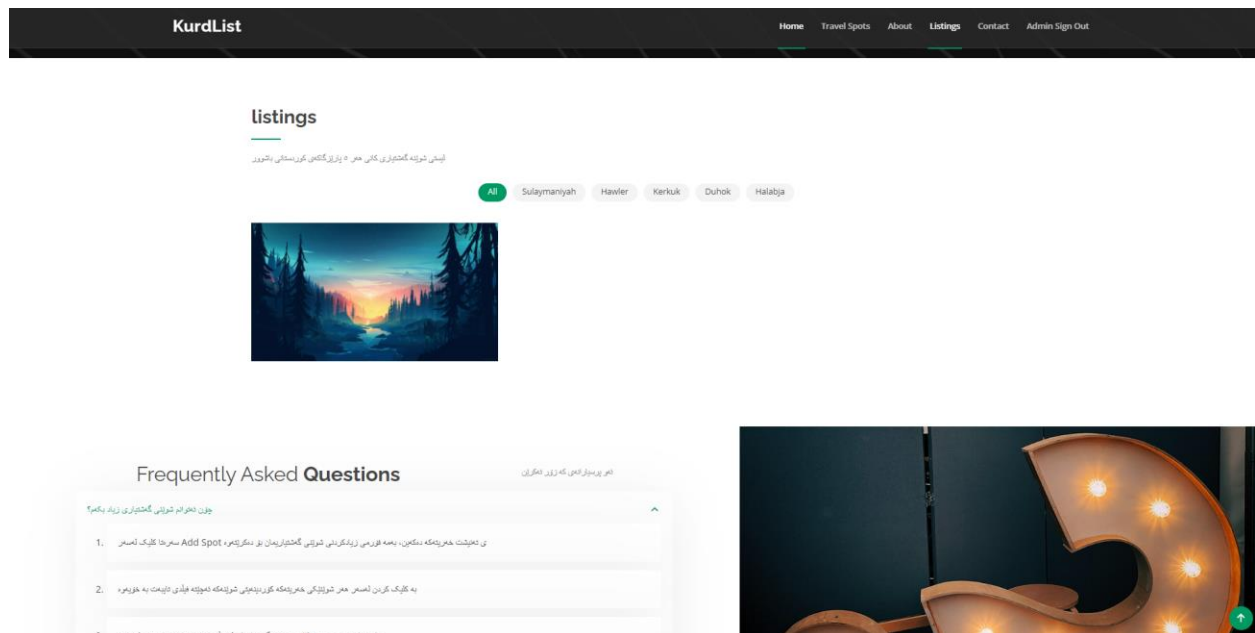

Figure 0.5

Here all spots approved and unapproved will be counted according to their city.

Here are some the most commonly asked questions.

## Contact

in this section a map to Koya's block 1 dormitory is shown with the creator's information.

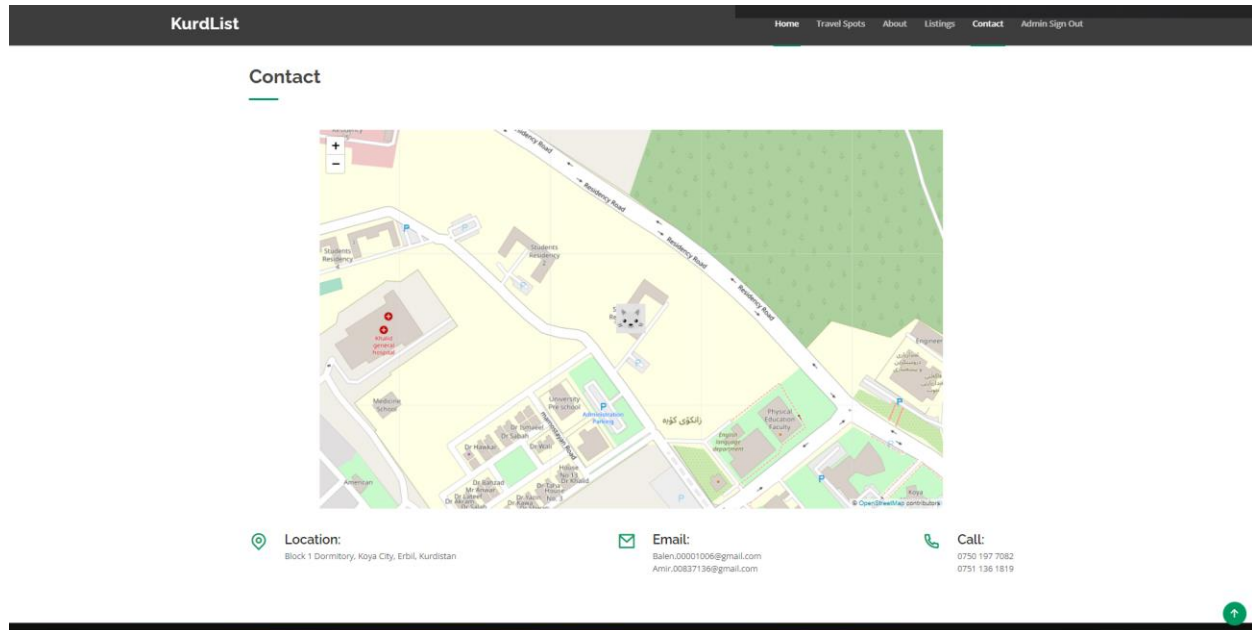

Figure 0.8

## Contributions

I did all the backend and some parts of the front end, Amir did the forms and most of the front end and tested the website thoroughly (Yehia, 2019). We have a video about all the website features and with listings which will we upload when we have better netowk.

## Methodology

Users who add destination spots get their information about the spot through the internet or through their experience.

For example if someone visited a spot where he found it enjoyable and great, then he could come to the website and add it there using the information and photos he gained there, this way others could benefit too.

Some others might add spot and get their information from the internet.

## Discussion

Some short comings of the website might be the limitation of the technologies that we were allowed to use, and the actual amount of hours that we worked on it.

Some others problems might be that Kurdish users don't use websites as often and many might not use it to share their spots.

Tourism is help full as stated by [Yasmine Yehia](#) "Tourism boosts the revenue of the economy, creates thousands of jobs, develops the infrastructures of a country, and plants a sense of cultural exchange between foreigners and citizens." (Yehia, 2019)

## Conclusion

This website will really help others to share their experience. It will help improving Kurdistan's image to tourist, help locals find spots outside of their scope and many other benefits.
